***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 5,913,785 to Moller et al. in view of U.S. Patent No. 3,815,299 to Sorensen et al.

Regarding claims 1-4, 10, 11 and 12, Moller discloses a skylight window assembly having a glazing fixed in a rectangular frame "L" shaped frame (claim 3). Moller also discloses a sliding screen mounted to the skylight as an accessory (claims 6-9). Sorensen discloses a sliding sunroof having a glazing (fig. 3: 16) and an "L" shaped frame (fig. 3) comprising a transverse inwards recess extending in the longitudinal direction of the frame (fig. 3: 41). However, Sorensen discloses a window glazing, not a screen. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Moller by using the external sliding roof frame disclosed by Sorensen to house the accessory shade disclosed by Moller in order to provide adequate sun protection for the structure's occupants.

Regarding claim 5, Sorensen does not disclose the recess in his frame as having a partially cylindrical bottom. However, It would have been obvious design choice to use a cylindrical bottom in order to use narrower wheels through the track.

Regarding claim 6, Sorensen discloses the recess in his frame as having a flat bottom section (fig. 3: 43).

Regarding claims 7, 8 and 9, Sorensen does not disclose the recess in his frame as having a "V" shape or an outward projection. However, It would have been obvious design choice to use a "V" shape or an outward projection in order to avoid using rollers and lower costs and maintenance.

### ***Response to Arguments***

Regarding the use of the Moller reference, Moller discloses the basic claim structure of the instant application, as claimed in claim 1. The component 19 of Moller is not used in the same capacity of the instant application's component 511 however, Moller in view of Sorensen contains the basic structure of the instant application.

Regarding the screening accessory, Sorensen discloses the basic claim structure of the instant application except it does not disclose a screen. It would have been an obvious improvement to replace the existing panel with a screen for the reasons cited above.

**Conclusion**

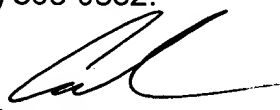

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
